

Fabric Specification Sheet

Apollo

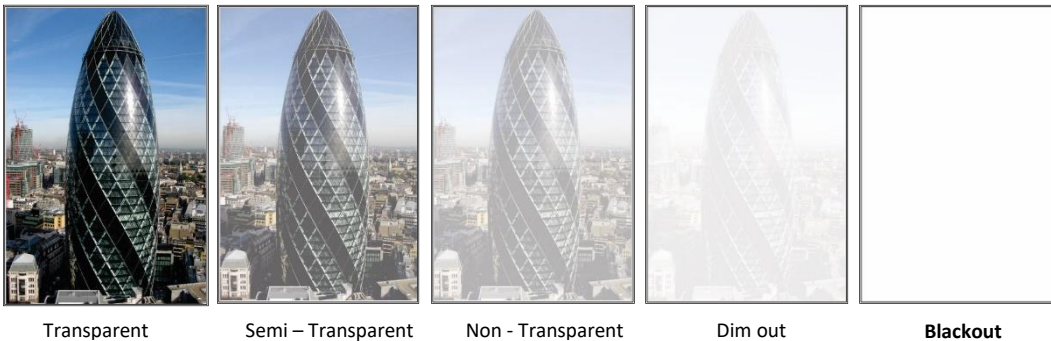

Description:

Apollo blackout was designed for the use in large scale roller blinds. Its hanging characteristics, which were tested for heights up to 5 m, are outstanding. The heavy, foam-coated blackout fabric remains absolutely straight even at such dimensions and displaying no curling. Its subtle colours are perfectly attuned to its application within the commercial environment.

Composition:

Composition : 100 % polyester
 Construction : woven fabric
 Pattern dimensions (w x h) : no pattern

Transparency: blackout, average openness factor 0 %

Special features:

Flame retardant : yes
 Halogen free : yes
 Suitable for wet room : no
